

SALAMANDER

ESE

Solid Edison Screw Cap Emitter

Infrared Internationale of North America

phone: (616) 784-8997

fax: (616) 784-7775

- 96% energy efficient
- Solid color temperature indicating decal
- Edison screw cap design - allowing for ease of element replacement
- Available in a wide variety of wattages and voltages
- Suitable for use in commercial, agricultural and industrial applications

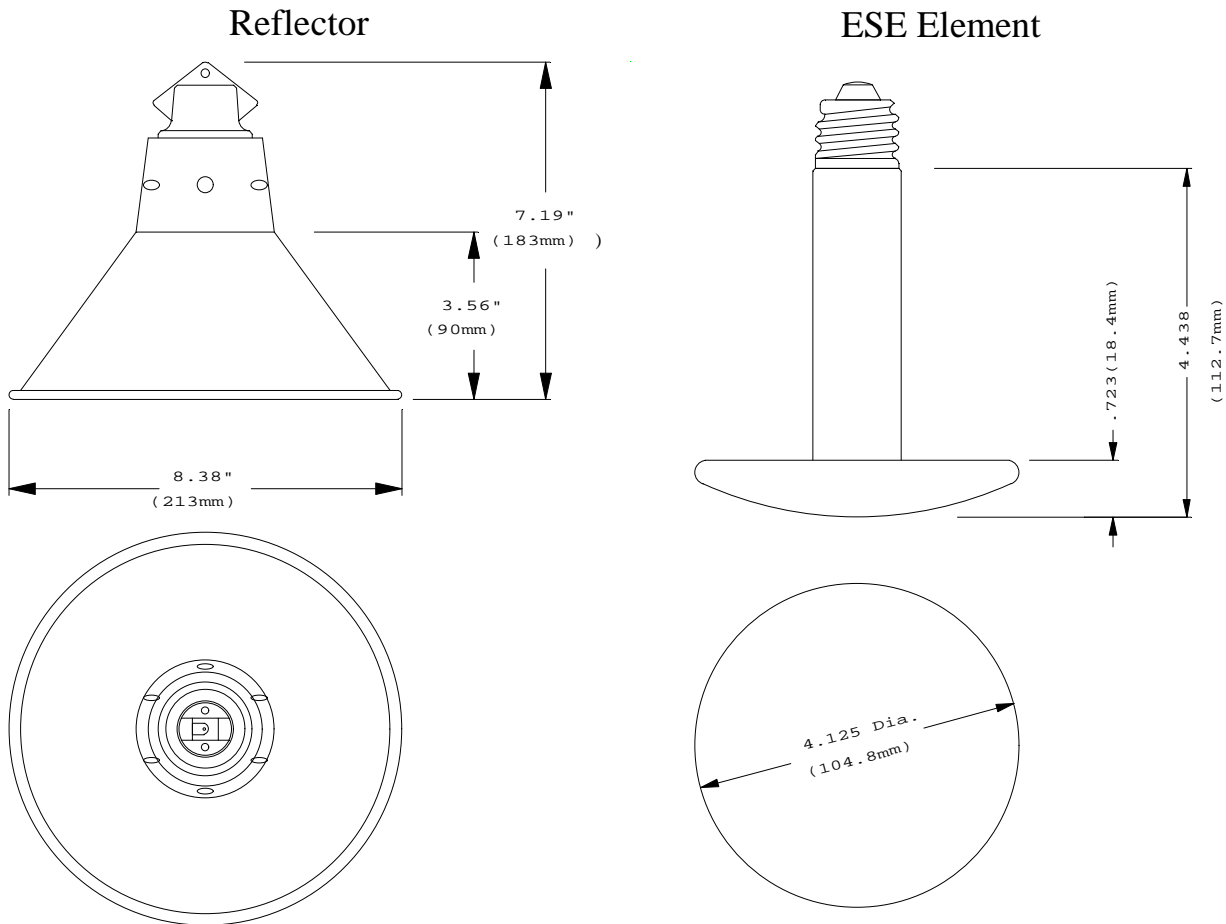

Now, replacing elements can be as easy as changing a light bulb.

Unique in design and universal in application.
The ESE element provides a breakthrough technology for applications which could benefit from broad range infrared dispersement.

Type: ESE

Wattages: 60-100-150-200-250, other wattages made to order.

Voltages: 120 - up to 240

Available accessories:

ESE/R - Spun aluminum reflector

ESE/H - Porcelain holder

ESE/G - Wire guard

ESE/RHG - Complete set (reflector, holder and guard)
